Linda's Lines

Hello all. It seems that March madness around here means lots of work getting done.

As we move into spring and good weather, look around at all that has been done.

Short range shooting on the pistol range has been expanded. New power has been extended to the trap houses. The old well is gone and a new soda machine goes in the old well house (proceeds to the junior programs). Also, the start of 5-stand expansions. The 100-150 fence has been reinforced, lead recycling and other projects have all been done. Thanks to the MOAPL team. You guys are awesome!

We seem to be past the worst of the closures due to Covid so meetings are back on the schedule. We still don't know when Junior Rifle will be up, although we have resumed Junior Trap and Junior Pistol. Be sure to check the website before you come up since changes are frequent occurrences.

Please order your barbecue tickets. It will be here before you know it. Adults are \$20 until April 15, after \$25. Since we are celebrating 75 years as an association, this is going to be a great event.

Don't forget we will be having elections soon. If you are interested please let us know so we can get the nomination process started.

Thank you for your patience during our range work and the extended closures. Be safe and see you soon.

Linda

DARRIN'S DOSSIER

● March Range Closures

In order to keep in good standing with the City of Escondido (from whom we lease the property) and the EPA, we need to remove the lead from the hill and properly document that removal.

Because California considers lead a Hazmat item (Proposition 65), we must remove the lead properly and legally. There is a specific exemption in the heavy-metals code for scrap metal recycling and that is how we remove the lead from the hill properly and legally.

Years ago, we used a contractor that worked at night in the summertime but that contractor has stopped reclaiming lead. For the past few years, I have been searching for another contractor that would be dependable, effective, and properly licensed. Through a referral from another range in the area, we found Windmill Enterprises, LLC. The owner/operator met with Linda and me and estimated how much lead was on the hill. After some discussion of logistics, we came up with a plan. He had his equipment shipped here from Atlanta, Georgia and he came out with an employee to begin the work.

In a perfect world, the work would have been done in 7-10 days. However, we don't live in a perfect world. In order to separate the dirt and rocks from the lead, the material needs to be dry so that the equipment does not get clogged. Well, we had some rain. As soon as the material dried out enough to run through the equipment, it rained again. The original 7-10 days turned into about three weeks.

Because of the size of the equipment and the fact that he had to constantly have equipment and people up on the hillside, we were forced to close the 150, 100, Trap, and Pistol Ranges. We tried having the recycler stop work for a few hours at a time so that we could run a few events during the weekend. Because that further delayed the recycling progress, the range closures were extended even further.

Dossier continued from pg. 2

At the time of this writing, based on current weather forecasts and the progress made by the recycler, we expect to have the Ranges open the first weekend in April.

● Be a Raffle Donor

Your donations help support our monthly General Meeting Raffle. Our entertainment Chairman is Bud Smith. If you have items you would like to donate to our monthly General meeting raffle, please contact Smoldering Bud at budsmith223@gmail.com. Please consider new or used items in working order. Thanks for your support.

● Left the Range

Ronald Bowman passed away in December of 2020. He has been a member since 2002 and was an active member and RSO. He will be missed by many of us who knew him. Please keep him and his family in your thoughts and prayers.

● Membership Renewals

Renewal notices will be mailed out soon. If you have an address change, please contact the Association Clerk at efgaclerk@cox.net or phone 760-432-2089.

● Elections

Our annual elections for the Board of Directors is coming up soon. Nominations from the floor will be held during the April general meeting with additional nominations and the actual election during the May general meeting. All of the Officer offices and four Director positions are open. Anyone wanting to nominate someone outside the general meetings can contact the Election Committee chair, Elvio Marchi at elvio1@cox.net

● EF&GA 75th Anniversary Barbecue (5/16/2021)

This year we will be celebrating our 75th year as an Association. If it all goes according to plan, we should be through the worst of the pandemic and we should be able to congregate outdoors again. As usual, we will have the popular and fun participation events like Black Powder, Archery, Tomahawk Throwing, 22 Rifles, Trap, and lots of other activities. This family-friendly event always has fantastic food. Yes, Bekker's is catering again this year so the food will be excellent as usual. There will also be lots of raffles, drawings, and silent auction items.

JUNIOR CORNER

by Patrick Russ

RULES TO LIVE BY

1. **Treat** every firearm as if it were loaded
2. **Never** point your firearm at anything you don't intend to shoot
3. **Keep** your finger straight and off the trigger until you intend to fire
4. **Know** your target and the surroundings

It was almost exactly a year ago that I had to inform everyone that the Junior Marksmanship Program was being suspended due to the Covid-19 outbreak. At the time, we thought that it would only last a few weeks or at worst a couple months. We had no idea that it would take this long to reopen. Thankfully, we have slowly started to reopen the Junior events. We had to ensure that we could follow all Covid-19 guidelines. This was done by making an announcement during the morning safety brief as well as all the safety briefs throughout the day. We also had a Health Safety Monitor to ensure that everyone was being safe. We started with Junior Trap, where we had 17 shooters. Two weeks later, we held a Junior Pistol event and had 21 shooters. It was great to see everyone. The kids did a great job. Daysha Halbert scored a 395 out of a possible 400. How many of you think you could beat Daysha?

Last month, I had the honor of attending the memorial for Mike Marks. I am proud to say that EF&GA was well represented. I counted at least 12 members in attendance. It was a very nice event, held at Fire Station 1 in San Marcos. As many of you know, Mike was a firefighter for San Marcos and served for 17 years with the department achieving the rank of Fire Captain. At EF&GA, Mike continued to serve as a shoot chair for Smallbore Rifle and Junior Archery. He was also active with SPAR and Black Powder events. He was also a former president of the Association and a current member of the Board of Directors. I know that the Junior Marksmanship Program is a better program because of Mike. While Mike may be gone, he will not be forgotten.

I would like to give special thanks Stan at North County Shooting Center for helping the Junior Marksmanship Program by locating and purchasing shotgun shells for the Junior Trap program. Not only was he able to find the ammo for us, he was able to get it at a very good price, saving the program hundreds of dollars. Additionally, Stan was able to find firearms for the BBQ raffle, again, saving the Association even more money. I can tell you first hand that Stan and Darin, at North County Shooting Center, have strongly supported EF&GA and the Junior Marksmanship Program for many years. This year, I will have BBQ tickets available to buy at North County Shooting Center.

I'm sure that everyone has noticed that the range has been closed most of March. During this time, we have been doing lead reclamation and recycling, as well as the MOAPL (Mother Of All Project Lists). At the time of this writing, we have reclaimed multiple tons of lead. That works out to 6,923 games of trap with 5 shooters, shooting 25 rounds of 1oz loads or 34,615 individual shooters or 864,000 rounds being shot or over \$76,000 in ammo costs (at today's prices). This is an average, of course. Put another way, if all the lead was 115gr 9mm rounds, it would be equal to 3,294,000 rounds, or 9,450,000 22LR rounds, or 31,764 Glock 19 pistols, or 22 Springfield Armory 1911 pistols, or 72,000 cans of soda, or 343,602,000 jelly beans, or 4,536,000 cups of coffee (about 6 months' worth for Darrin), or 12 Prius cars, or 3 Ford F150 Trucks, or 300 Ed Migdals. I'm sure, by now, the numbers are much higher.

Normally, I like to do something fun for April Fools Day. Unfortunately, I have not been able come up with anything that is any crazier than some of the stuff going on now. So instead, I wish everyone a happy April and I look forward to seeing everyone at the BBQ.

Dossier continued from pg. 3

Special 75th Anniversary shirts are available in both men's and women's sizes and styles. Ed Migdal is taking pre-orders now so that we will only print as many as we need. Contact Ed for further details.

Tickets are available now. You can mail the form in to the PO Box with a check for the appropriate amount and the clerk will send out the tickets. Tickets will be \$20.00 until April 15th, then \$25.00 up to the day of the event.

MOAPL

Many of us all talk about improvements that we would like to see at the Range. When Linda became president, we decided to start compiling a list of those projects. After a while, we found that some of those projects could augment some of the others on the list. We knew that many of these would require Range closures and could be expensive but we continued to maintain the list.

One of the safety features that we have wanted to add for years is a downrange light system for the Trap Ranges. In order to make that work, we needed to run underground conduit between all three Trap houses and to a switch location behind the Trap pads so that the lights could be turned BEFORE someone walks downrange to maintain the Trap machines. That means that we would need to do some electrical work as well as some trenching.

On the Pistol Range, there is a pneumatic target turner at the 25-Yard line that is used by the NRA Precision Pistol (formerly known as Bullseye Pistol). The participants told me that setup and teardown for the event is a

lot of work and that an underground line for air and electrical would be perfect for the event. That would be a lot of infrastructure for just one monthly event but if we continued the pneumatic line to the Trap houses, we could use air tools and blowers to clean and maintain the Trap machines. That means that we would need to do some more trenching.

Our 5-Stand course is great but it takes a lot of volunteer time to set it up and tear it down. In order to make some of the machines permanent (instead of pulling lots of trailers), we would need to pour some concrete behind the wall at the #7 house on the hill and behind the 150-Yard

RANGEMASTER SOUND OFF

by Jay Zimmett

There are a lot of firearm mistakes people make.

First - let's review some basic safety rules. These are frequently broken by everyone.

1. NEVER point a firearm at anything you don't want to destroy.
2. Treat ALL firearms as if they were loaded at all times.
3. Keep your trigger finger outside the trigger guard and OFF of the trigger until you are ready to fire.
4. Be certain of your target, your line of fire, and what lies beyond your target.

Cold Range:

- Blue Blinking Lights **ON**
- **DO NOT** handle Firearms & Equipment
- Handle Targets
- Sweep up brass behind the Yellow and in front of the Red line

OK TO GO DOWN RANGE

Hot Range:

- Blue Blinking Lights **OFF**
- Handle Firearms & Equipment
- OK to Load/Unload Vehicle
- Sweep up brass behind Red line

DO NOT GO DOWN RANGE

Rule #1 is to never point a gun at anything you don't want destroyed. Always keep the muzzle pointed in a safe direction. ***Almost every unintentional injury with a gun is a violation of this rule.*** If you follow this rule, even if you fail to follow all other rules you won't hurt yourself or anyone else.

Rule #2 - Always treat a gun as if it were loaded. Even if you just checked the weapon and you're sure it's empty, it means you still adhere to rule #1 above as if the gun were loaded. Too many incidents occur with "I thought it was unloaded..."

Rule #3 - Also known as Keep your booger-hook off the bang-switch until you're ready to fire. Strangely enough the crude language often times works when you have one or two students who fail to follow the rule. ***Almost every negligent discharge requires a violation of this rule!*** If you violate this rule, someone could die!

Rule #4 - Be sure your target is safe to shoot - for instance, it won't create sparks that could start a fire, or cause a ricochet that might endanger others. You have to know your line-of-fire is safe and, if you miss or your bullet passes through, that nothing is behind your target.

As for shooting techniques...

- Forgetting to breathe, you need to breathe to avoid the shakes.
- Improper body position. Leaning back, like they're trying to keep their bodies away from the handgun they're shooting.
- Jerking or yanking the trigger!
- Improperly gripping the firearm. Squeezing too hard or lightly holding the firearm are both incorrect.
- Improper stance or supporting position. Stance should be balanced and supportive during recoil. This usually means your strong side foot is about 1/2 step back from your weak-side foot. Your weight should be forward, on the balls of your feet.

Important note: For any firearm with a detachable magazine, when emptying the gun, ***remove the magazine first!*** Remove the magazine first, then empty the chamber of the pistol or rifle. Do it backwards and you could have a round in the chamber even though the magazine has been removed.

Dossier continued from pg. 5

Also, the electrical that goes to the far Trap machines is unreliable and too close to grade-level in a few areas. That means that we need to do some more electrical work, some more trenching, and pour some concrete.

On the 100-Yard Range, there was once a small concrete target slot for about the first 3 or 4 positions at the 75-Yard line. That was buried under dirt and broken clays many years ago. If we wanted to do it right, we would need to dig a trench and pour some concrete.

On the 100-Yard Range, we have had many requests to have a way to shoot at steel targets during casual shooting. The Board voted on this and approved it over a year ago but we never had an opportunity to get it completed. We have come up with a design that will contain any ricochet or splatter from hit or missed shots. This will require drilling some holes in the soil and pouring some concrete.

On the Pistol Range, we have had many requests to extend the short-range target slots (5, 7, and 10 yards) so that they could be used from all of the positions. The Board voted on this and approved it years ago but we never had an opportunity to get it completed. We came up with a simple design and it would require drilling holes in the soil and pouring concrete.

Next to the Pistol Range is the old well house. We have not used that well for years and we need a good place for a compressor. The old well house is in the perfect location and has 220v power for the well. While we are at it, the old well house would be the perfect location for a soda machine (This idea came from James Gordon). To make all of this work, we needed to have the well properly decommissioned, cut a hole in the side of the well house, and then pour more concrete.

By now, you are probably seeing some trends starting to appear. We need to do a lot of trenching, pour a lot of concrete, and do a bunch of electrical work. We figured that if we could do all of the trenching at once, hire professional concrete pumpers and finishers, and get a licensed electrician to do it all as a single project, we could do all of these at once. In order to do all of this safely we would need to call a Locator Service to mark existing electrical, phone, and water lines so that we don't accidentally tear up critical infrastructure with a trenching machine. In order to do all of these projects at once, we would need to have the ranges closed for a period of time while volunteers, contractors and equipment are working on the ranges.

One of the top items on that list was Lead Reclamation and Recycling. As I described above (see page 2 - March Range Closures), we found a lead recycler that is proficient, certified, and professional but they would need to have all of the ranges closed for at least a week. This created the perfect storm to launch what we now call MOAL – the Mother Of All Project Lists.

At the time of this writing, we are on track to have almost all of the items on the list done. The only project that had to be pushed back was the Steel Targets on the 100-Yard Range. This was postponed because the lead reclamation equipment worked best at the back of the 100-Yard Range. This project will be completed as well and we have a plan to complete much of the downrange work after dark in the coming weeks.

People who have heard about this and saw the work going on over the past few weeks have been thanking me for getting stuff done. In all honesty, I cannot take much credit for what has been accomplished. We have had many volunteers step up and help out. Some needed to get their volunteer hours done and some have been the glue that held us together putting in countless hours of blood, sweat, and tears to get it all done. **Linda Linaker, Chris Cote, Austin Cote, Dave Robertson, Gary Fukuda, Richard Baugh, Scotti Clary, James Gordon, Tim Hoy, Jack Starlin, Mark Fusting, Dave Shlager, Mark Baldwin, Dan Dorman, Patrick Russ,** and I got together over multiple meetings and divided up the list of tasks and got to work. Many others came and helped out with the work itself and we got it going while the lead reclamation/recycling was under way. This was a true team effort and I am truly honored and humbled to be part of this team.

TRAP CORNER

Infrastructure

For the past 3 weeks we have had the Range closed while a contractor handled lead reclamation and recycling. While this has been inconvenient for shooting, it has worked out well with our plans to improve our infrastructure.

While the ranges were closed, we poured concrete slabs for some of the 5-Stand machines so that setup and teardown of 5-Stand will be much easier and faster. We also poured the foundation for a 'Duck-Tower' that will eventually have a trap machine 30+ feet above ground to throw a target from behind you descending as it passes in front of you on the line. The actual tower and trap machine are not installed yet but the concrete foundation and the electrical are in place so that as the budget allows over time, we will be able to proceed with the improvements.

We also installed new electrical circuits to the new concrete slabs at the #7 house (up on the hill) and the #2 location (behind the 150-Yard berm). Soon we will have a permanent machine at both locations. When the concrete was poured and the electrical was installed, they were both designed to accommodate

two trap machines at each location. Today, we only have enough machines in our stable for one at each location but the infrastructure is now and ready to accommodate more.

We also installed conduit between the trap bunkers and to the light towers to accommodate downrange safety lights. The idea is to have the lights flashing BEFORE anyone walks downrange to load or adjust a trap machine. While the lights are flashing, the voice command for the trap machines are also suspended. At the time of this writing, the light fixtures are out getting a protective coating applied in order to make them weather-proof. The plan is to have them operational around the middle of April.

The infrastructure projects listed above are only a portion of the list of projects that we executed while the Ranges were closed for lead reclamation and recycling. The Pistol and Rifle ranges have had additional improvements as well. The bulk of this work was done by **Dave Robertson, Chris Cote, Gary Fukuda, Richard Baugh** and bunch of other volunteers. I was around for some of the work but those guys are the real rock stars. If you see any of them, be sure to thank them for their hard work and commitment to excellence.

BLACK POWDER NEWS

by Garth Warner

Covid-19 Update: Effective now, we are back to members and invited guests for our Black Powder shoots. The same guidelines for table spacing, social distancing, and temp/health checks are still in effect. Watch the EF&GA website for updates.

April 4th Muzzle Loading Bullseye Contest - This will be a Long Range Pistol contest. One target at 25 yards "duelist style". One target at 50 yards two-handed. Thirteen shots at each target, best ten count for score. The contest starts at 08:00. Contact Patrick Watson for details.

NOTE: You can now shoot Revolver in SPAR contests.

April 4th Traditional Archery Contest - This will be a FITA II course. Contact David Premitz for details. Contest starts at 10:00 ish, (after the pistol shoot)

April 17/18 Spar Camp - This will include the Spar Hawk and Knife Championship. Included in the camp will be a basic "how to" class on "Browning your Rifle or Pistol", as well as other Primitive skills. There will be a Medicine Bag ceremony in memory of Mike Marks.

April 25th Muzzle Loading Silhouette Contest - This will be my favorite contest of the year, LONG RANGE. Targets will be at 100, 125, and 150 yds. If you are an OPEN CLASS shooter, this is your best chance to WIN a contest for the year. The long range event tends to intimidate less proficient shooters, but in reality, you can win Open Class with a score as low as 6 or 8 points. Contact Garth Warner for details. Pistol starts at 08:30, rifle starts at 10:00. Due to the extensive setup, early arrivals, and/or volunteers are encouraged.

Class Description: This class covers firearm safety and basic skills of Shotgunning. It is also designed to train the student the proper skills required to hit a moving target. The NRA Certified Shotgun Course teaches stance, gun ready position, swing to target, trigger pull, and follow through. The class consists of classroom exercises and hands-on instruction including live fire exercise through which students will learn and demonstrate safe and proper shotgun shooting procedures and technique. Hands on range time will include techniques required for shooting moving targets-(Trap). Upon successful class completion students will receive the NRA Basic Shotgun Certificate. Classes are limited to 12 Students and a deposit is required to secure registration.

To reserve your spot call or email:

Bud Smith 858-922-6489 budsmith223@gmail.com

Dave Premetz 760-489-1082 slixgunr@yahoo.com or register online through the NRA at www.nra.org

Bud Smith: Chief Range Safety Officer/ Range Safety Officer,
Certified NRA Instructor: Certified Muzzleloading Rifle, Muzzleloading Pistol, Muzzleloading Shotgun, Refuse to be a Victim, Basic Rifle, Pistol and Shotgun.

David Premetz: NRA Training Counselor/Chief Range Safety Officer/Certified Instructor for Rifle, Pistol, Shotgun, Range Safety Officer, Personal Protection, Home Firearm Safety.

California Department of Fish & Game - Certified Hunter Education Instructor.

International Bow Hunter Education Federation - Certified Bow Hunter Instructor.

NRA Blended Pistol Class

This course is geared towards those who are new to pistol shooting, or those familiar with handguns but desiring structured training on the fundamentals.

This version consists of two Phases: Phase I is self-paced, on-line instruction through the NRA website; Phase II is the actual range portion following the completion of your on-line training. You will need to register & complete the Phase I portion prior to conducting the Phase II hands-on range portion.

Class Schedule – Phase II (8 am – 1 pm)

- April 14
- June 23
- August 25
- October 19
- December 15

Please contact Dave Premetz, Jay Zimmert or sign up at the NRA training website.

How to place a classified ad in the newsletter

Please help to keep the classified section easy to read and well organized. There is no cost as long as you are an EF&GA member in good standing. Classified ads run for ONE newsletter (one month). If you want to repeat an ad for another month (with price adjustments, etc...) simply re-submit the ad request via e-mail.

Please submit requests for classified ads via email to newsletter@escondidofishandgame.com and be sure to double-check for spelling and grammar errors.

Members Only are allowed to submit Classified advertisements. Your Membership Number must be included with any advertisement request so that we can properly vet the submission before it is published. The Membership Number will NOT appear in the advertisement. Your Membership Number is on your membership badge on the same side as your photo.

No Illegal Transactions may be advertised in this newsletter. It is now illegal to sell ammunition in California without either going through an FFL or a licensed ammunition reseller. EF&GA cannot facilitate any illegal commerce of a state regulated commodity. This is also why firearm sales should include a phrase similar to Buyer pays DROS when advertising the sale of a firearm.

It may sound obvious but requests for classifieds are frequently received with not enough information to be useful to a reader.

There are 5 main components of a classified ad:

Category – Most classifieds fall into one of 3 categories, 'For Sale', 'Wanted', or 'Lost & Found'.

Subject/Title – This will appear in bold in the advertisement. This should be short (2 or 3 words) and concise.

Description – This is the body of the advertisement and can be a few sentences but not more than a paragraph. Abbreviations appear cryptic and are not recommended unless they are well known acronyms.

Price – A specific dollar amount as well as qualifiers give the reader important information. For example, "\$600 or Best Offer, Buyer pays DROS, Will consider trades"

Contact Info – This should be a name AND a phone number (including area code) and/or an e-mail address.

CLASSIFIEDS

All sales must comply with Federal and State laws!

WANTED: M1 30 Carbine in good shape to shoot.
Contact Bud Smith at 858-922-6489 or Budsmith223@gmail.com

PRIMERS: WANT TO BUY OR WANT TO TRADE FOR SMALL RIFLE PRIMERS OR SMALL PISTOL PRIMERS. I'm not going to resell these, I need them for my reloading and shooting hobby. Powders I have to trade: Win-748 (3-1lb unopened containers), Hodgdon BLC-2 (3-1lb unopened containers), IMR-7828-SSC (4-1lb unopened containers).
Contact Todd at 858-429-8310 or tmedin0411@gmail.com

Wanted - I need 1000-2000 small rifle and pistol primers and Hogdgen CFE 223, Benchmark and/or Varget powder. I will pay a fair price based on "normal retail" plus a little for your time/trouble.
Contact Jim at 760 533 1347 or jschaible99@gmail.com

I have about 40 pounds of MP 190 (pulled powder) sealed in 1# vacuum bags. This powder is great for 9mm and .45 plus other calibers. \$40/#. \$5 from each pound will be donated to the Junior Marksmanship Program.
Contact Robert Reid at 858-705-4610

Remington 11-87 Sportsman - 20 Ga. 26 inch barrel. Synthetic Black Stock. Includes Mod and I/C chokes, original box, and manual. This was my back up dove gun, and has less than 500 rounds fired. Excellent condition. \$650 OBO, Buyer pays DROS.
Contact Brad at 949-680-0050 or buckgarret@gmail.com

Browning Citori O/U - Almost new Feather model 12 gauge, 26 inch with Invector chokes. \$1100.00 firm,
Browning SxS - 12 gauge, 28 inch barrels fixed chokes (full and mod). \$1000.00 firm. Buyer pays DROS
Contact Joe Palumbo at 949-973-2175 or Palumbojoe@aol.com

FREE - LYMAN 110V BULLET FURNACE - Bought it in the 60's, worked fine until last week, wouldn't stop flowing. Probably has a crack in the spigot or the pot. Good project for someone with a welder friend, may be able to substitute a Lee spigot.

Relive the simpler days of Old California with us...

Rancho Guejito Vineyard grows its grapes in the fine soils and climates of the last remaining intact Mexican land grant in California. Our 23,000 acre ranch was established in 1845. Nearly 175 years later, we have kept the tradition of cattle ranching, agriculture, and wine making alive.

Visit us every weekend for hayride tours, live music, and wine tasting.
